This text is for questions 16 and 17!

Dear Sir or Madam,

Yesterday I moved to a house rented from your agency in Brighton Boulevard. To my surprise, I found the house is not well maintained.

The master bedroom has no key. The air conditioner does not work. How could I use my washing machine if the outlet is missing. The worst of all is that the main faucet has broken that no water can flow. This makes me unable to wash, to cook and to do any other things.

I had told Mr. David, one of your employees, about my problems but I got no response from him. I also called your secretary Miss. Brown but again, there was no response.

I would appreciate if you send me a mechanic to have those problems fixed immediately.

Your faithfully

Sarah Johnson

**This text is for questions 26 to 29.**

New glass bottles are made mainly of silica sand. The sand is melted in a furnace, at a very high temperature. Recycled glass bottles are made in a very similar way, but cost less and use up fewer natural resources.

The process begins when people take their used bottles and jars to a bottle bank. Next, the bottles and jars are taken by lorry to the recycling plant. At the plant, bottle tops and lids are removed. After that, the glass is crushed into small pieces. The crushed glass is then sent by lorry to a bottle factory. Here, it is mixed with a small amount of silica sand. It is then melted in a furnace, at a lower temperature than a new glass. Finally, the hot liquid glass is drawn out of the furnace and fed into machinery that makes it into bottles.

The recycled glass is pure and as strong as the new glass. The glass can be recycled many times without losing its quality.

26. What is the text mainly about?

- A. How glass is recycled .
- B. How glass is crushed into small pieces.
- C. How glass is transported to the factory.
- D. How to mix glass with the silica sand.
- E. How silica sand is melted.

27. How is the quality of the recycled glass compared with that of the new glass?

- A. Better.
- B. Worse.
- C. The same.
- D. Stronger.
- E. More pure.

28. We learn from the text that ....

- A. the quality of the recycled glass is poorer than that of the new ones
- B. the quality of the recycled glass lessens after being recycled
- C. more natural resources is needed to recycle using the glass
- D. silica sand is only used for producing the new glass
- E. glass can be recycled very easily

**We Should Change the Payment System**

Nowdays, the system of payment gradually changes. Most people use debit cards instead of cash to make payment. They think it is more effective, efficient, easier, and simpler. However, there are still arguments about the use of debit cards as a method of payment.

Well, if you use the card, you will say that the card is so practical. You don't need to count how much you should pay. When paying in cash, people are afraid of making mistakes in counting the banknote for both the payment and the change. With debit card's the mistakes is made smaller.

Moreover, you should know that the debit cards are safer than money. Suppose you bring a lot of money when travelling. If it is lost or stolen, you will be left with nothing in your hands. However, if you bring a debit card, you can just phone the bank which issues the card to block it.

On the other hand, people who disagree on the use of debit card will say that its use is so limited. When you buy something in a traditional market, or a vendor, for example, can you pay using a credit card? Of course not.

Another thing is that, if you want to use the card, you should make a purchase at minimum amount. If you make less than the minimum transaction, you can not make use of the card.

For those reasons we think that credit cards are not fully effective as a means of payment. We should trace the incoming and ongoing money in our account. Besides, we have to control our habit of buying first, paying later habit. Otherwise, without being realized we are charged a lot. You don't have to use credit cards if not necessary.

30. What is the text about?

- A. Differences between payments by cash and credit cards.
- B. The disadvantages of paying in cash.
- C. The advantages of using credit cards.
- D. The advantages of using debit cards.
- E. Different payment systems.

31. According to the text, one advantage of using the debit card is that ....

- A. it cannot be stolen
- B. it is as practical as using cash
- C. we can use it everywhere for shopping
- D. the possibility of mistakes in counting is smaller
- E. we can make a purchase at minimum amount

32. What is paragraph 3 about?
- Debit cards for travelling.
  - The advantage of debit cards over cash.
  - The safety system of debit cards.
  - What to do when you lose cash.
  - How to bring a debit card.

The following text is for questions 33 to 35.

**Directors:**

Mark Osborne, John Stevenson

**Writers:**

Jonathan Aibel (screenplay), Glenn Berger (screenplay)

**Stars:**

Jack Black, Ian McShane, Angelina Jolie

The story of 'Kung Fu Panda' is nothing really new, but it is told so well that actually pack an emotional punch. And it never comes off as laughable, which in lessers hands could easily have happened. Speaking of laughs, there are many to be had here as well. 'Kung Fu Panda' works on just about every level a family movie can.

The cast features Jack Black as Po the Panda. The furious five, the most feared group of warriors in all of China, consists of Tigress (Angelina Jolie), Monkey (Jackie Chan), Mantis ( Sth Roger), Viper (Lucy Liu), and Crane (David Cross). Their master is Shifu (Dustin Hoffman), a fur ball creature who is a legendary teacher of Kung Fu. Escaped from prison and on his way to claim the Dragon Scroll, which will make him the all powerful Dragon Warrior, is the good gone bad Tai Lung (Ian McShane). But first, he'll have to muscle his way around 400 pounds of panda to get to it. 'Kung Fu Panda' is a damn good time at the movies. This was the movie that Dreamworks Animation so desperately needed after the disappointing 'Shrek The Third'. With gorgeous animation, spectacular action, a great cast and dramatic weight of an Akira Kurasawa film, Kung Fu Panda is one of favourite movies of the year.

33. The text is ....
- a review of " Kung Fu Panda"
  - how the film of "Kung Fu Panda" was made
  - why the film is liked by every family
  - the technicality of the film
  - the characters in the film
34. According to the text ...
- Dreamworks Animation always makes good movies.
  - "Shrek the Third" is as successful as previous movies.
  - "Kung Fu Panda" is a new story in the genre.
  - the producer is very proud of "Kung Fu Panda"
  - "Kung Fu Panda" is better than "Shrek the Third"

35. Who is the teacher of the great warriors?
- Mantis.
  - Crane.
  - Shifu.
  - Po the panda.
  - Tai Lung.

### **2012 Film Review**

*2012* is Roland Emmerich's film which uses the Mayan Calendar and other end-of-days prophecies for their doomsday scenario. It imagines the world coming to an end in *2012*.

*2012* film brings off a series of wonders. The movie hits its peak early on. It starts when Cusack drives a limo through the streets of Los Angeles as freeway and skyscrapers crumble all around him from the shock of a 10.5 earthquake. The preposterous flying sequence is equally thrilling. The climax occurs aboard the giant ark. When an equipment malfunction almost threatens the entire mission.

Unfortunately, the crucial sequence is not filmed or edited with the requisite clarity. In *2012* film, Emmerich leaves us befuddled as to exactly what is happening to whom. However, Emmerich's *2012* deserves credit for offbeat casting. Cusack supplies his trademark hand-dog charm. McCarthy has perhaps his best role ever as Peet's cocky. Danny Glover lends dignity to the role of the tormented president. Chiwetel Ejiofor, as the chief scientist, brings a moving sense of anguish to a stock role. Platt has fun playing the villain of the piece, and Woody Harrelson also chews the scenery as a bug-eyed radio prophet trying to warn his listeners about Armageddon.

All in one, *2012*'s cinematography, production design and visual effects are award-worthy. Music also propels the movie. It presents American Idol runner-up, Adam Lambert, who provides a rousing anthem over the end credits.

36. The writer of the film *2012* was ....
- Adam Lambert
  - Danny Glover
  - Cusack
  - Roland Emmerich
  - Woody Harrelson
37. Which part of the film should be improved?
- The music.
  - Visual effect.
  - The equipment.
  - Crucial sequence.
  - The design.
38. "The movie hits its peak early on" (paragraph 2)
- The underlined word is closest in meaning to ....
- average
  - top
  - failure
  - name
  - descent

**This text is for question 39.**

Despite potential drawbacks and the controversy surrounding it, nuclear energy does have a few advantages over some other methods of energy production. The first merit is concerned with expense. Less uranium is needed to produce the same amount of energy as coal or oil, which lowers the cost of producing the same amount of energy. Next, it is a dependability factor. When a nuclear power plant is functioning properly, it can run uninterrupted for up to 540 days. The running of the plant is also not contingent of weather or foreign suppliers, which makes it more stable than other forms of energy. Finally, while nuclear energy does have some emissions, the plant itself does not give off greenhouse gasses. One of the reasons that nuclear energy falls under fire so frequently is due to the many disadvantages it brings. First, uranium is used in the process of fission because it is a naturally unstable element, meaning that special precautions must be taken during the mining, transporting and storing of the uranium. Next, there is a case of water pollutant issues. Nuclear fission chambers are cooled by water. This water is then turned into steam, which is used to power the turbines. While measures are taken to ensure that no radiation is being pumped into the environment, other heavy metals and pollutants can make their way out of the chamber.

39. A nuclear energy plant assures reliable sources of energy by ....
- its continuous operations of the power plant.
  - producing uranium as the main material.
  - creating fission reactions in the reactor.
  - releasing little greenhouse gases into air.
  - lowering the cost of energy production.

**Should Automatic and Semi-automatic Guns be Banned**

First I'll state points and why they should be banned. Automatic and semi-automatic guns are military weapons. They fire continuously for about 20 second firing hundreds of bullets until the trigger is released. Although they are military weapons, they are sold to the public. People buy them for keeping them at the house in case of a break-in but in that case you wouldn't need a giant weapon to fend off a robber and with children they can be fatal.

In this next section I'm going to talk about why they shouldn't be banned. Farmers sometimes need these rifles not as weapons but maybe put down a cow with broken legs or spinal cord as it the quickset way to kill animal without feeling a long period of pain.

Well, as you can see I have more points for getting rid of the weapons than againts, so from this you obviously can see what must be done. Not only to make things safer but to bring humanity to parts of our society. I don't think that automatic and semi-automatic weapon should be distributed throughout the community in urbanized areas because they are just another excuses for trouble.

40. What is the writer's opinion about the issue?
- He disagrees with the issue of using guns freely.
  - He disagrees with the issue of banning guns.
  - He supports the idea of banning guns.
  - He supports the idea of using guns.
  - He stands equal position for both.

41. "Farmers sometimes need these rifles not as weapons but maybe to put down a cow with broken legs or spinal cord ..." (Paragraph 2)

The underlined words have the closest meaning to ....

- A. to cage
- B. to kill

**The following text is for question number 42.**

According to 1996 World Food Summit, "Food security exists when all people, at all times, have physical and economic access to sufficient, safe and nutritious food that meets their dietary needs and food preferences for an active and healthy life." To World Health Organization (WHO), "Food security means fulfillment in these conditions: First, all people at all times have both physical and economic access to enough food for an active, healthy life. Also, the ways in which food is produced and distributed are respectful of the natural processes of the earth and thus sustainable. Next, both the consumption and production of food are governed by social values that are just and equitable as well as moral and ethical. Then, the ability to acquire food is ensured. Beside, the food itself is nutritionally adequate and personally and culturally acceptable. Finally, the food is obtained in a manner that upholds human dignity." Similarly community food security has been defined by Public Health Association of British Columbia as follows: "Community food security exists when all citizens obtain a safe, personally acceptable, nutritious diet through a sustainable food system that maximizes healthy choices, community self reliance and equal access for everyone."

42. What is the topic of the text above?
- A. Concepts of food proposed by world organizations.
  - B. Aspects needed to be fulfilled for food availability.
  - C. Food security as defined from different sources.
  - D. Minimum criteria for providing nutritious food.
  - E. Quality food according to different institutes.

### Gorillas

Gorillas are the largest of all the primates. The animal order is including Lemurs, tarsiers, monkeys, and apes. They are the anthropoid apes which have the greater in size. Gorillas are terrestrial animals, inhabiting the lands, not the water. Many of them live in the forests of central West Africa.

A male gorilla can be 180 centimeters tall and can weigh 200 kilograms. Physically gorillas are very powerful, but they do not often fight. In fact they are peaceful animals. Gorillas live in small family groups of about 15. In a group, there is one strong, older male, some young males, and a few females with their babies. Like some other kind of apes, they are vegetarians. They move slowly around a large area of jungle eating leaves and bushes.

In some ways gorillas are like humans. However, according to some careful research, they are not the ancestors of human beings. Unfortunately, people hunt and kill gorillas. People also cut down and burn their trees where they live. There are now only about 10.000 gorillas left in the world.

43. The text implies that to protect gorillas from extinction, the government should ....
- A. punish hunters who hunt animals
  - B. forbide people to get into the forest
  - C. forbide people to cut trees in the forest
  - D. remind people not to disturb gorillas' habitat
  - E. make strict regulation on hunting and protecting of the gorillas
44. "Gorillas are terrestrial animals, inhabiting the lands, not the water." (Paragraph 1).

The underlined word has similar meaning to ....

- A. living in
- B. destroying
- C. wondering
- D. roaming around
- E. gathering in
